

NEO FIREGLOW

13W Sunset Dim Downlight

Classic Series

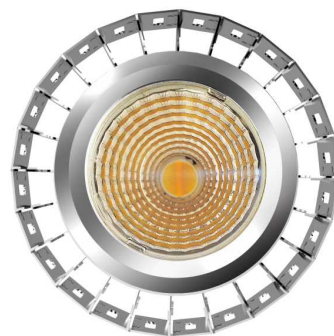

Proven. Quality. Customisable

The NEO Fireglow Downlight Module allows the colour temperature to shift as the downlight is dimmed. This effect is called Sunset Dimming. It creates a warm ' fire glow' ambiance perfect for restaurants, hotels and cafes. It can be smoothly dimmed to a warm white (1800K).

The FIREGLOW downlight delivers 880 lumens, giving a similar appearance to the traditional dichroic lamp. As the lamp is dimmed, the colour temperature gradually becomes warmer, a replication of the behaviour of the traditional halogen lamp.

IP44

SPECIFICATIONS

Material Specifications

Material	Aluminium, with Tempered Glass
Dimensions	78mm (H) x 62mm (Dia)
Ingress Protection	IP20
Warranty	5 Year Replacement

Electrical Specifications

Power Supply	18W Osram OTe Driver Constant Current 260mA
Connection Method	Australian 2-Pin Plug & Lead
Input Voltage	240V
Dimming	Yes

Optic Specifications

Light Source	13W Sharp LED, with Reflector
Beam Angle	22° / 36° / 60°
Delivered Lumens	900lm - 40lm
Correlated Colour Temperature	3000K - 1800K
CRI	93Ra at 3000K
Rated Lifetime (L70B20)	50,000 Hrs
